Innovative Infrastructure Solutions

“Engineering the South since 1927”

## Surveying & Mapping

Professional Surveying and Mapping services provide the foundation for all other disciplines. We are experienced leaders in geodetic, boundary, topographic, hydrographic, as-built, and route (R/W) surveys.

We offer multiple services throughout our Surveying and Mapping group. These include Global Positioning System (GPS) surveys, Geographic Information System (GIS) services and subsurface utility investigations.

## Inspection Points

Baskerville-Donovan has designed numerous Inspection Points for land and sea control facilities. These include Roadway Transportation inspection facilities,

Riverine Interdiction, International Port Entry Land/Sea Cargo Container Inspection and Military Base Entry type scenarios. Typical Facilities included Anti-Terrorism/Force Protection components, guard stations, sentry posts, K-9 kennels, under vehicle inspection stations, cold storage, detainment structures, and billeting facilities.

“Making a Positive Difference for  
our Clients, Together.”

## International Consulting Services Overview

The staff at Baskerville-Donovan, Inc. has provided innovative designs for Federal Clients for over 30 years.

Projects have taken us from the remote parts of the Amazon jungle to the deserts of Africa.

Services have been provided in:

- El Salvador
- Honduras
- Nicaragua
- Costa Rica
- Guatemala
- Panama
- Colombia
- Venezuela
- Ecuador
- Peru
- Bolivia
- Afghanistan
- Africa

Consultant services include:

- Site Investigations
- Surveying
- Geotechnical Investigations
- Master Planning
- Design
- Design/Build
- Estimating
- Construction-Based Services

## Master Planning

Proficient Master Planning is the key component to successfully planning and funding multi-million dollar infrastructure projects. Experienced in Country-Wide Riverine Master Planning, Airfield Aviation Master Plans, Forward Operating Location (FOL) planning, Comprehensive Country Wide Military Installation Master Plans, Regional Transportation Infrastructure and Frontier Region Master Planning, BDI can successfully plan each stage of the project from conception to construction completion.

## Airports, Aprons, Taxiways & Heliports

Aviation projects ranging from minor pavement repairs to new airfields, Baskerville-Donovan has the experience and expertise. We specialize in light to heavy aircraft runways, multiple aircraft aprons, major heliports, autorotation strips, barrier arresting systems and supporting utility infrastructure. Base support facilities including aircraft hangers, maintenance and administration facilities, fire/crash rescue stations, fuel storage and distribution, ammunition magazine and bunkers, equipment storage billeting quarters, and Anti-Terrorism/Force Protection measures.

## Base Camps

BDI has designed remote, centralized and joint-use base camps for numerous military branches including National Police units and the Coast Guard in several countries and stateside.

From 30-man installations to 5000 men facilities, BDI has provided master planning and design for roadway networks, billeting, kitchen/dining facilities, administration, support services, motor pools, force protection and all utility infrastructure needs.

## Riverine Facilities

Our attention to detail has afforded numerous opportunities to design riverine installations at some of the world's most challenging hydro-geologic locations. From ocean front facilities driven by tidal fluctuations to riverside installations experiencing as much as 30 meters in varying river stages, the engineers at Baskerville-Donovan have the solution. Site specific challenges are where we excel. We have designed floating installations for river patrol craft, boat launches for high speed pursuit vessels, piers to major wharfs for Coast Guard Point Class Cutters.

## Force Protection Measures

Remote regions of South American, Afghanistan and Africa require specific force protection measures not found in normal design projects. Baskerville-Donovan has been at the forefront in innovative designs for personnel bunkers, fighting positions, security walls, elevated observation towers, personnel trench networks, fortified structures and base entry systems. The objective is always to *"Keep our troops safe."*
