## Landscape Architecture

**Landscape Architecture** is a key ingredient in the services Baskerville-Donovan performs whether we are involved with a beautification program for an existing facility or master planning for a new complex. Services offered by our landscape architects include site planning, preparation of planting plans, irrigation plans, site design plans, master plans, and the associated permitting.

Comprehensive Planning is a broad term describing a wide range of activities from site planning in association with the architecture group to a regional effort involving community-wide planning and zoning as well as the preparation of land development codes.

Representative planning activities include:

- Campus Master Plans
- Land Use Planning for New Communities and Large Developments
- Unified Land Development Regulation Codes
- Marine and Waterfront Development Planning
- Urban Design
- Environmental Impact Studies for Projects of Regional Significance
- Fiscal Impact Studies/Impact Fee Analysis
- Transportation and Corridor Studies
- Industrial Development Planning
- Coastal Management Planning & Permitting
- Public Participation Consensus Development
- Development of Regional Impact Studies
- Permitting
- Recreational Facilities Design
