The project engineering consultant Baskerville-Donovan, Inc. continues to collect on-site data including the locations of on-site septic systems. Survey teams are finalizing their field efforts and the design team will continue site visits including direct contact with some residents within the project area. It is anticipated that the 60 % design effort will be complete in June.

Following the 60 % design submittal, Baskerville-Donovan will continue the design effort with final design scheduled to be complete by October 31, 2021.

Construction funding for the project is anticipated to be available by spring/summer of 2022. Construction is scheduled to begin in the summer of 2022 and take approximately 12 months.

## Soundside Septic to Sewer Estimated Project Timeline

All dates are estimates and are based on information available on 6/8/2021. Schedule is subject to change.
